

i-Ome® Protein Array Kit

Discover autoantibody biomarker signatures from a large pool of candidate autoantigens

i-Ome Array Proteins

> 1600 Candidate Autoantigens

- Harvest more data - profile autoantibodies against more than 1600 autoantigens from just microliters of sample.
- Have the flexibility of running Sengenics arrays in your own lab at an accessible price.
- Be confident with the highly specific and reproducible data generated from arrays made with our patented KREX technology that ensures that proteins are correctly folded, full-length and functional.
